

Non-Conveyable

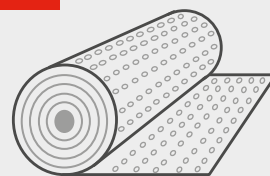

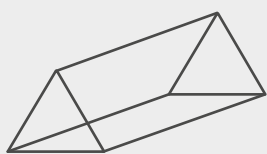

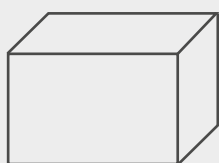

What does it mean? **Non-Conveyable**

A shipment that due to its nature, size, shape or packaging, can not be handled by our sorting belt. These shipments must be processed manually. For a non-conveyable shipment a surcharge will be charged.

What does non-conveyable include?

A package is non-conveyable if...

- ✦ It concerns rolls and tubes.
- ✦ It has protruding parts or doesn't have flat bottom, or the center of gravity of the package is above the center.
- ✦ Due to their nature, the goods may be damaged by automatic sorting.
- ✦ Or can cause damage to the automatic sorting system.
- ✦ It is packed in plastic and/or bubble wrap.
- ✦ It is not properly packaged.
